

Rue de Dijon - 3 years of organic community building
by
Maxim Bragoli, La Pépinière | Espaces Collectifs, Montreal, QC, CANADA
Client:
City of Montreal, borough of Montreal North

Project statement:

Rue de Dijon creates a safe and family-oriented living environment in a highly populated part of the city, using placemaking as a driving force for change. This project aims to eliminate social tensions between cultural groups and offer a space to dynamic youth to express themselves.

The implementation of this project over three years allows for greater agility and the capacity to evolve as the initiative grows organically with the community.
